Summary

Full Stack Developer with experience building AI-powered web applications, CRM systems, and customer-facing platforms using Next.js, React, TypeScript, Firebase, and modern JavaScript ecosystems. Experienced in integrating LLM APIs, building scalable frontend architectures, implementing backend workflows, and shipping production-ready applications focused on automation, performance, and user experience. Strong background collaborating across product and design teams to deliver responsive, high-impact solutions.

Technical Skills

Frontend: NextJS, ReactJS, JavaScript, HTML5, Tailwind CSS, Responsive UI Development

Backend & Database: Firebase, Supabase, Vercel Postgres, Neon, API Integration, Real-Time Data Handling, Serverless Functions

AI & Automation : OpenAI API, Google Gemini API, Replicate API, LangChainJS, Prompt Engineering, AI Workflow Automation

Tools & Workflow: Git, GitHub, Vercel, Figma, Cursor, Claude Code, VS Code, Gamma, NotebookLM, Read AI

Experience

Africa AI Consult | Frontend Developer | 03/2025 - Present

- Built and deployed CRMs using Nextjs and Firebase, that supports document uploads, service workflows, leads management pipeline and reporting features improving customer satisfaction and reducing staff workload.
- Built interface for an AI chatbot for visa eligibility and customer service, implementing dynamic package rendering in interactive card layouts, in-chat booking workflows, clickable badge selections for guided inputs, and real-time streaming responses to enhance conversational UX.
- Designed, built and shipped multiple high-converting landing pages and CMS-driven websites with AI-assisted content generation, dynamic form builder and landing page builder features.

MEST | Junior Frontend Web Developer | 06/2024 – 12/2024

- Led the frontend implementation of an online wholesale agricultural produce distribution platform for React and JavaScript, enabling vendors to manage products, orders and dashboards.
- Gained practical expertise in modern frontend development tools and agile development methodologies to deliver scalable solutions.

CalBank | Operations Officer NSS Personnel | 11/2023 – 06/2024

- Increased branch digital product adoption by 30%, through customer onboarding and digital education initiatives.
- Streamlined customer engagement processes, contributing to improved retention and operational efficiency.

Toyota Ghana Company Limited | System Admin Student Intern | 10/2022 – 05/2023

- Reduced branch downtime by 40% by reconfiguring network infrastructure and resolving router failures.
- Supported IT infrastructure monitoring, troubleshooting and system reliability improvements.

Selected Projects

AI Powered Portfolio Website Builder

Tech Stack: NextJS, Vercel, Google Gemini API

Overview: A full-stack web app that extracts structured data from uploaded CVs using AI and generates hosted and published user-customized portfolio landing pages.

Adansi EduConsult Website and CRM Platform:

Tech Stack: NextJS, Firebase, OpenAI API

Overview: Landing page and business platform combining CRM functionality, communication tools, CMS features, and AI-enhanced workflows.

AI Image Generation Platform

Tech Stack: NextJS, TypeScript, Replicate API, Supabase

Overview: Integrated external AI image generation APIs with secure upload handling and prompt-based output rendering.

Hotel Management System - Website and Admin Platform

Tech Stack: ReactJS, Supabase

Overview: Hotel landing page with room booking and concierge request form, and an admin portal for real-time room and booking management.

Education

BSc in Computer Science and Engineering | Completed: 11/2023

University of Mines and Technology

Certifications

UX Design: Foundations of User Experience | Google - 02/2024

Start the UX Design Process: Empathize, Define, Ideate | Google - 05/2024

Fundamentals of Web Design | IBM - 08/2024

Advanced Diploma in Occupational Safety and Health Management | ICMS - 01/26
